PROFILE

Full Stack Web Developer with hands-on project experience in building responsive and dynamic web applications. Skilled in HTML, CSS, JavaScript, React.js, and Tailwind CSS, with knowledge of Node.js, Express.js, and MongoDB. Experienced in developing frontend interfaces, integrating REST APIs, and building full-stack projects. Passionate about writing clean code and creating efficient, scalable, and user-friendly web applications.

PROJECTS

E-Commerce Web Application

React.js, JavaScript & Tailwind CSS

- Developed a responsive e-commerce website using React.js and Tailwind CSS.
- Created product listings, reusable product cards, and interactive UI components for a smooth shopping experience.
- Designed a modern layout for mobile and desktop screens.
- **Project Link: https://hassan-tech-store.vercel.app**

Weather Web Application

React.js & REST API Integration

- Built a responsive React.js weather app fetching real-time data from OpenWeather REST API.
- Implemented dynamic search, dynamic background visual updates based on weather conditions, and a custom navigation bar.
- Styled using Tailwind CSS for clean, mobile-first design across all device screens.
- **Project Link: https://weather-app-by-hassan-ali.vercel.app**

TinyURL – URL Shortener Web Application

MERN Stack (MongoDB, Express.js, React.js & Node.js)

- Developed a full-stack URL shortener that converts long URLs into short, shareable links.
- Built frontend and backend functionality with React.js, Node.js, and Express.js, using MongoDB to store URL records.
- Implemented URL shortening and redirection functionality to redirect users from short links to their original URLs.
- **Project Link: https://url-shortner-by-hassan-ali.vercel.app**
